

Empowering Students:
Help Us
Change Their
World!

Junior Achievement is a worldwide nonprofit organization that presents important life skills through hands-on educational materials focusing on financial literacy, entrepreneurship, and work readiness.

THIS SCHOOL YEAR, JUNIOR ACHIEVEMENT WILL REACH MORE THAN 100,000 STUDENTS WITH OUR PROGRAMS! THIS WILL REQUIRE OVER 8,000 VOLUNTEERS!

REAL Life is a day long program designed for students in 11th or 12th grade. The program is held at a local high school. It consists of a series of activities intended to help students gain an appreciation for good financial decision-making. Help facilitate one of five sessions throughout the day and make an impact to last a lifetime.

STEM Summit is a day long program designed for 9th or 10th grade students and held at a local high school. This program includes nine 30-minute sessions with science experiments, technology, engineering, math competitions, and trades modules. Use your experience to inspire students to pursue careers in STEM fields. Each volunteer will work with nine different groups of students during the day.

YES! (Your Economic Success) is a half day morning program held at the middle school. It consists of a series of activities intended to help students realize the importance of financial and career decisions. The program's synergy is created by every student in the building participating in JA in a single day. The volunteer in this program takes on an elementary based JA approach. The difference from the regular JA program is that the volunteer does one activity with four different groups of students during the day.

Each day **JA BizTown** opens its doors, 5th and 6th grade students become JA BizTown 'citizens' for the day where they work in one of 14 businesses, manage their personal and business finances, develop and sell products, hold business meetings, pay taxes and donate to charity. We look to business and community volunteers to assist the students on certain days during the school year.

Classroom programs consist of FIVE sessions, each 30-55 minutes in length. We are in need of volunteers to share Junior Achievement's pre-written sessions that introduce students to things like a 'want' versus a 'need' and how to write a check. During the activity-based sessions, you will be introducing students to careers in our community and helping them to explore career options while in school.

The Symposiums are one-day workshops of mentoring, motivation, and opportunity for high school sophomores and juniors. Participants are students who are nominated by their schools. A typical Symposium includes presentations and speakers, mentoring sessions, and activities that help students gain personal and career success skills. The students who participate have the opportunity to explore a variety of opportunities available to them after high school.
